AI Engineer with more than 1 year of experience building LLM-powered agentic applications using LangChain and LangGraph, including RAG pipelines, semantic retrieval with Vector Stores, and multilingual conversational systems. Works with core LLM techniques — prompt engineering, tool/function calling, and context and memory management — and evaluates agent behavior using LangSmith tracing and custom eval harnesses. Applies AI governance practices such as guardrails, access control, auditability, and human oversight when building agentic systems.

SKILLS

- Programming Languages: Python, SQL, C, C++
- Generative AI Engineering: LangChain, LangGraph, Retrieval-Augmented Generation (RAG), LLMs, Embeddings, Prompt Engineering, Tool/Function Calling, Context & Memory Management, Agentic Workflow Design.
- Observability & Evaluation: LangSmith, Tracing, Custom Eval Harnesses, LLM Evaluation
- AI Governance: Guardrails, Access Control, Auditability, Human Oversight
- Software Engineering: SDLC, CI/CD Pipelines, Git/GitHub, Object-Oriented Programming, API Design & Microservices

EDUCATION

Bachelor of Technology — Computer Science and Business Systems | 2021-2025 | CGPA: 7.9

Class XII (PCM) — Bright Career Higher Secondary School, MP Board, Pipariya (M.P.) 2021 | 89.4%

Class X — Bright Career Higher Secondary School, MP Board, Pipariya (M.P.) 2019 | 90.2%

EXPERIENCE

AI/ML Engineer — Intellostack, Bhopal, July 2025 – Aug 2026

- Built a multilingual RAG-based YouTube assistant (ChatMyVideo) using LangChain, Groq LLMs (LLaMA/GPT-OSS), FAISS indexing, and HuggingFace embeddings, supporting 14 languages with 95% response accuracy across 20+ videos and 50+ users at a 1-3 second average response latency.
- Built a LangGraph-based workflow that classifies review sentiment, tone, urgency, and issue type, then routes each review to generate a context-aware LLM response, improving automated customer review handling.
- Developed a parallel LangChain workflow (StudySnap) using LLaMA 3.2, Ollama, Groq, and Gradio that generates topic explanations, structured notes, and quizzes, streamlining personalized learning.

CERTIFICATIONS

- AIML Developer — TIH IIT Patna
- Python — Cisco
- AI Data Scientist — PMKVY Skill India Center

ACHIEVEMENTS

- Won 1st place among 35 competing teams in a Project Poster Presentation organized by Oriental Group, as part of a 4-member team, building the prediction model for a plant disease detection project.
- Managed a team of 15 members across multiple college events as a core team member of Pixela Club, a photography club with 60+ members.

EXTRACURRICULAR

- Esports (Valorant): competitive play developing strategic thinking, rapid decision-making, and cross-functional teamwork.
- Volleyball: regular team sports participation involving leadership, coordination, and collaborative problem-solving under pressure.
